***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 7, and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original specification provided a second temperature rate rise between 2-40 °C/hr and a first and third temperature rate rise to be at least 40 °C/hr. Thus, the specification provided or confined the temperature rate rise to the noted magnitudes.

The amended claims now remove the noted magnitude temperature rate rise and provide a relative comparison between the second temperature rate rise with the first and third temperature rate rise. This results in temperature rate rise magnitudes that are not supported in the claimed specification.

For example, the claims now encompass a second temperature rate rise of 100 °C/hr as long as the temperature rate rise of the first and third temperature rate rise is higher than 100 °C/hr. Similarly, the claims now encompass a first and third temperature rate rise of 1 °C/hr so long as the second temperature rate rise is below 1 °C/hr.

Consequently, in reading the specification, it is explicitly clear that the specification does not implicitly, explicitly or inherently provide the now encompassed claimed temperate rate rise.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
